

EXPORT CHECKLIST

___ 1. Horse Name: _____ Registration # _____

___ 2. Horse's current location _____

The AHA exportation rule requires the horse to be located within the United States or Mexico at the time the export endorsement is requested. If the horse has already been exported, the AHA Registry may, at its discretion, choose to issue the export endorsement but may require the assistance of the foreign registry or other items to ensure the identity of the horse and the validity of the request.

___ 3. The Certificate of Registration is attached.

Please check one of the following:

___ A. This horse has been sold, the sale is complete and the transfer portion of the Certificate of Registration has been properly completed. **-or-** A Race Horse Transfer Form has been completed and returned with the Certificate of Registration for Racing (see reverse side of this form for transfer fees).

___ B. This horse is being exported on lease; no transfer to be recorded. The horse is being leased to:

___ C. No transfer to be recorded. Horse is being sold on contract or exported by current owner.

___ 4. This horse is being exported to _____ on _____.
(Destination country) (Anticipated export date)

Name and address of importer (foreign owner):

___ 5. Labeled color photographs (all four views) which clearly show all white markings, brands and tattoos are attached. For grey horses, pink skin must be visible. **For horses with no white markings provide photos of all whorls.**

___ 6. The applicable fees are enclosed (see reverse side of this form).

___ 7. **If the mare has been bred** to a purebred stallion prior to exportation with the resultant foal to be born in the foreign country, the AHA Registry will provide certification of the service stallion, breeding dates etc. provided the following section is completed:

Stallion name: _____ Registration number: _____

Type of service and service dates: _____ Natural (hand) _____ Pasture Exposure

_____ Artificial Insemination _____ Transported/Stored Semen

If a stallion has semen which is to be retained in the United States and used after the exportation of the stallion, or if foals conceived using stored or transported semen will be registered after the exportation of the stallion, all Transported/Stored Semen Service Certificates required must be purchased *prior to the exportation of the stallion* and prior to the submission of the Export Endorsement request.

Neither blood typing nor DNA typing is required by AHA prior to exportation. However, we recommend that all horses be blood typed and DNA typed prior to exportation for identification and other purposes*. In addition, stallions that have covered mares prior to exportation or have semen stored to be used for future breedings and mares that produce foals prior to exportation should be DNA typed to avoid possible difficulties in registering foals in the United States. **For foals born 2002 and later, DNA type testing is required for parentage verification.**

*Some foreign registries may require that a horse be blood typed and/or DNA typed prior to exportation and re-sampled after importation to their country for identification purposes. Exporters are advised to contact the appropriate foreign registry to determine any specific requirements.

Fees

Export Endorsement \$30.00 (\$55.00 for non-members/\$85.00 for foreign non-members)

Document shipping and handling \$50.00

Transfer fee (*if applicable*): \$15.00 – 0-6 months from the date of sale -OR- \$40.00 – over 6 months

If you have any questions regarding export requirements or procedures, please contact us at 303-696-4500.
